KEYWORD CLUSTERS

Prepared: July 3, 2026

Site: fintrack.app (Astro static site, marketing-site/)

Scope: On-page SEO, technical SEO, structured data, content gap analysis, keyword plan

Table of Contents

- 1. Executive Summary
- 2. Site-Wide Technical SEO Audit
- 3. Per-Page SEO Analysis & Target Keywords (8 pages)
- 4. Content Gap Analysis — Recommended New Pages
- 5. Full Keyword Plan (421 keywords across 14 clusters)
- 6. Prioritized Action Roadmap

1. Executive Summary

FinTrack's marketing site (fintrack.app) is a well-built, fast, static Astro site with genuinely strong bones: every page already has a title, meta description, canonical tag, and Open Graph/Twitter markup wired through a shared BaseLayout, and a sitemap is generated automatically via @astrojs/sitemap. That is ahead of where most marketing sites start.

The gap is not "missing basics" — it's **keyword coverage and structured data**. With only 8 static pages, the site can realistically compete for perhaps 15–20 head/branded terms on its own. But the UAE personal-finance space has hundreds of realistic, winnable long-tail queries (per-bank statement import, per-competitor comparisons, per-Emirate locality terms, and educational budgeting content) that currently have **no page to rank**. This report maps 421 such keywords to either an existing page or a specific new page/URL FinTrack should build.

3	0	0	2
TITLES OVER 65 CHARS (TRUNCATION RISK)	PAGES WITH FAQPAGE / JOBPOSTING SCHEMA	BLOG / CONTENT PAGES	REFERENCED ASSETS MISSING (FAVICON, OG IMAGE)

Top 5 findings, ranked by expected SEO impact:

- 1. Missing public/ directory — no robots.txt, no favicon.svg, no OG images.** BaseLayout.astro references /favicon.svg and defaults ogImage to /og-home.jpg, but there is no public/ folder in the project and the built dist/ output confirms neither file exists. Every social share (LinkedIn, X, WhatsApp — the primary UAE sharing channel) will render with a broken image, and there is no robots.txt to explicitly declare the sitemap location to crawlers.
- 2. Zero structured data for FAQ, Jobs, and Reviews despite having the content.** The FAQ page has 26 hand-written Q&As, the homepage JSON-LD claims a 4.9-star/2,847-review aggregate rating with no visible reviews, and Careers lists 4 open roles — none of these are marked up with FAQPage, Review, or JobPosting schema. These are the highest-ROI fixes in this report: the content already exists, it just needs markup.
- 3. Three title tags exceed safe SERP length.** Homepage (82 chars), Careers (89 chars), and FAQ (67 chars) will be truncated in Google search results, often mid-word, which both looks unpolished and drops the keyword that was meant to close the title.
- 4. No blog or educational content section.** This is the single biggest structural limiter on keyword coverage. 55+ high-intent informational queries (budgeting tips, cost of living, salary planning for UAE/Dubai/Abu Dhabi) have no page to target them at all.
- 5. UAE bank names and competitor names are mentioned in copy but have no dedicated landing pages.** 112 bank-specific and 36 competitor-comparison keywords are FinTrack's clearest differentiation vs. global apps (YNAB, Mint, Monarch) — right now all of that intent funnels into one homepage, diluting relevance for any single query.

2. Site-Wide Technical SEO Audit

2.1 Crawling & Indexing

Item	Status	Detail
XML Sitemap	✔ Present	Auto-generated via @astrojs/sitemap integration in astro.config.mjs (site: https://fintrack.app). Produces sitemap-index.xml + sitemap-0.xml at build time.
robots.txt	✗ Missing	No public/ directory exists in the project, so no robots.txt is emitted to dist/. Crawlers will default to "allow all," but there is no explicit Sitemap: directive pointing search engines to the sitemap.
Canonical tags	✔ Present	Every page passes canonicalPath into BaseLayout, which builds an absolute canonical URL. Implemented consistently and correctly.
Favicon	✗ Broken reference	BaseLayout.astro references /favicon.svg but the file does not exist anywhere in src, public, or dist.
noindex handling	✔ Correct	noindex prop implemented and correctly defaults to false; explicitly passed as false on /privacy and /terms (redundant but harmless).

2.2 Meta Tags & Social

Item	Status	Detail
Title tags	⚠ 3 of 8 too long	Homepage (82), Careers (89), and FAQ (67) exceed the ~60-char safe zone. See Section 3 for rewrites.
Meta descriptions	✔ Mostly healthy	All 8 pages have unique, hand-written descriptions in the 94–201 char range. Homepage description (201 chars) is slightly long but acceptable since Google sometimes shows extended snippets.
Open Graph tags	⚠ Implemented, but images 404	og:title, og:description, og:url all correctly templated in BaseLayout.astro. og:image defaults to a non-existent file on every page that doesn't override it.
Twitter Card tags	⚠ Same image issue	summary_large_image card type is correctly set, but inherits the same missing image.
Duplicate/thin meta	✔ None found	All 8 titles and descriptions are unique — no duplication issues.

2.3 Structured Data (JSON-LD)

Schema Type	Where Used	Status
SoftwareApplication	Homepage, Pricing	✔ Present — includes offers and (on homepage) an aggregateRating block.
WebSite	Homepage	✔ Present
AggregateRating	Homepage (nested in SoftwareApplication)	⚠ Present in code, but no visible/crawable reviews exist on any page to substantiate the 4.9★ / 2,847-review claim — risk of Google disregarding or flagging the rich result.
FAQPage	None	✗ Missing — highest-priority gap. FAQ page and Pricing page both have ready-made Q&A content with zero markup.
JobPosting	None	✗ Missing — 4 open roles on /careers are invisible to Google for Jobs.

Organization	None	✗ Missing — no logo, sameAs social links, or founding date markup despite this info existing in on-page copy (About page).
BreadcrumbList	None	✗ Missing on all pages — low priority given shallow (1-level) site structure, but useful once /blog or /compare sub-paths are added.

2.4 Content Structure & Internal Linking

Strengths:

- Every page has exactly one H1, correctly used.
- Footer implements a clean, crawlable sitemap-style link structure (Product / Company / Legal columns) present on every page.
- Navbar + Footer are shared components — consistent internal linking site-wide.

Gaps:

- No breadcrumb navigation.
- No blog/resources link in the footer's "Product" or "Company" column — there's no content hub to link out to yet.
- About page tells a hiring-relevant story but doesn't link to /careers.
- Zero elements site-wide (all visuals are inline SVG/CSS) — this is fine for performance but means zero image-search surface area.

3. Per-Page SEO Analysis & Target Keywords

Each page below is scored against its current title/description/H1/schema, with specific findings and a rewritten title + description sized to avoid SERP truncation, plus its primary and supporting target keywords.

1. Homepage /

src/pages/index.astro

Current Title	FinTrack — Expense Tracker & Budget App for UAE I Know What You Can Spend Today 82 chars
Current Meta Description	FinTrack is the UAE's smartest personal finance app. Upload your bank statement, get instant AI categorization, and see your Safe-to-Spend number. Supports ADCB, Emirates NBD, FAB, Mashreq & more. 201 chars
H1	Know Exactly What You Can Safely Spend Today.
Structured Data	SoftwareApplication + WebSite (JSON-LD present)

FINDINGS

- Title tag is 82 characters — Google truncates around 580px (~60 chars for this font). The pipe-separated second clause will be cut in SERPs.
- H1 does not contain the primary keyword "expense tracker" or "budget app" — relies entirely on brand phrase "Safe-to-Spend", which has near-zero existing search volume.
- aggregateRating in JSON-LD (4.9, 2,847 reviews) has no visible, crawlable review source on-page — this is a common cause of Google manually disabling review-rich-snippet eligibility if it can't verify the reviews.
- og:image points to /og-home.jpg and favicon to /favicon.svg, but no public/ directory exists in the project — these assets 404, so social shares and the browser tab icon will show broken/blank images.
- No FAQPage or BreadcrumbList schema on the homepage despite having FAQ-style content blocks elsewhere on the site.

RECOMMENDED TITLE (47 CHARS)

Expense Tracker & Budget App for UAE I FinTrack

RECOMMENDED META DESCRIPTION (178 CHARS)

Track expenses the UAE way. Upload any bank statement (Emirates NBD, ADCB, FAB, Mashreq+), get instant AI categorization, and see your daily Safe-to-Spend balance. Free to start.

PRIMARY TARGET KEYWORD

expense tracker app UAE

SECONDARY / SUPPORTING KEYWORDS

budget app UAE

personal finance app UAE

bank statement scanner app

safe to spend app

best budgeting app UAE

Current Title	About FinTrack — Born from a Frustration with Financial Complexity68 chars
Current Meta Description	FinTrack was built by a team tired of finance apps that didn't understand UAE life. Our mission: make personal finance human, accessible, and actually enjoyable.163 chars
H1	Born from a frustration with complexity.
Structured Data	None (no Organization / AboutPage schema)

FINDINGS

- Title is 68 characters — borderline, will likely clip on mobile SERPs.
- No Organization schema (logo, founding date, sameAs social profiles) — a missed opportunity since the page states "Founded 2021" and lists team facts that are perfect structured-data candidates.
- H1 is a brand narrative line, not keyword-bearing. Acceptable for a brand/about page but the page has zero secondary keyword targeting for terms like "fintech company UAE" or "About FinTrack team".
- No internal links to /careers from the founding story, despite this being a natural, high-relevance link opportunity (team/mission → jobs).

RECOMMENDED TITLE (50 CHARS)

About FinTrack — Our Story & Mission | UAE Fintech

RECOMMENDED META DESCRIPTION (157 CHARS)

Founded in 2021 in the UAE, FinTrack builds financial clarity tools for 50,000+ residents, expats and GCC families. Meet the team and mission behind the app.

PRIMARY TARGET KEYWORD

About FinTrack

SECONDARY / SUPPORTING KEYWORDS

FinTrack company

UAE fintech startup

who built FinTrack

FinTrack mission

Current Title	FinTrack Pricing — Free, Premium & Institutional Plans 56 chars
Current Meta Description	FinTrack starts free forever. Upgrade to Premium for AED 36/mo (or \$89/year) to unlock AI analytics, unlimited statements, budget alerts, and family accounts. 159 chars
H1	Invest in Your Financial Future.
Structured Data	SoftwareApplication with 3 Offers (JSON-LD present) — good

FINDINGS

- H1 ("Invest in Your Financial Future") contains no pricing-relevant keywords — pages that rank for "[app] pricing" queries almost always have "Pricing" or the price itself in the H1.
- Good length on title/description — no truncation risk, keep this pattern as the model for other pages.
- On-page FAQ block (6 Q&As) has no FAQPage JSON-LD — this is the single highest-ROI structured-data fix on the site since it's already written, just not marked up.
- Currency inconsistency: JSON-LD uses USD (\$9.99/\$89) while on-page copy and meta description reference AED 36/mo — mixed currency signals can confuse both users and Google's price extraction.

RECOMMENDED TITLE (54 CHARS)

FinTrack Pricing — Free & Premium Plans from AED 36/mo

RECOMMENDED META DESCRIPTION (156 CHARS)

Compare FinTrack plans: Free forever, Premium at AED 36/mo (AED 327/yr), and Institutional. AI analytics, unlimited bank statements, family accounts & more.

PRIMARY TARGET KEYWORD

FinTrack pricing

SECONDARY / SUPPORTING KEYWORDS

- budgeting app pricing UAE
- expense tracker app cost
- cheapest budgeting app UAE
- free budgeting app UAE

4. FAQ /faq

src/pages/faq.astro

Current Title	FinTrack FAQ — Your Questions About UAE Finance Tracking Answered 67 chars
Current Meta Description	Find answers to common questions about FinTrack — bank support, Safe-to-Spend calculation, data security, billing, and UAE-specific features. 144 chars
H1	Frequently Asked Questions
Structured Data	None — biggest missed opportunity on the site

FINDINGS

- 26 well-written Q&A pairs across 5 categories exist in the page's own data array, but none are marked up as FAQPage JSON-LD — this page is the strongest FAQ rich-result candidate on the entire site and is currently invisible to that feature.
- H1 is generic ("Frequently Asked Questions") with no brand or product keyword — weak for ranking the page itself against queries like "FinTrack FAQ" or "UAE bank statement upload questions".
- Title at 67 characters risks clipping on mobile.
- Category headers (Getting Started, Safe-to-Spend, Billing & Plans, UAE-Specific) are H2s but each individual question is a <button>, not a heading — search engines weight heading-level Q&A text more heavily than button text for featured snippets.

RECOMMENDED TITLE (50 CHARS)

FinTrack FAQ — UAE Bank Import, Pricing & Security

RECOMMENDED META DESCRIPTION (154 CHARS)

Answers on UAE bank statement import, Safe-to-Spend calculation, data security, billing, and multi-currency support. Everything you need before you start.

PRIMARY TARGET KEYWORD

FinTrack FAQ

SECONDARY / SUPPORTING KEYWORDS

how does FinTrack work

is FinTrack safe

which UAE banks does FinTrack support

FinTrack data security

Current Title	Careers at FinTrack — Join the Team Building the Future of Personal Finance in the UAE 89 chars
Current Meta Description	Join FinTrack and help build financial clarity for millions of UAE residents and expats. See our open roles and learn what it's like to work here. 149 chars
H1	(not captured — verify against page design; role cards use h3-level headings)
Structured Data	None — no JobPosting schema on any of the 4 listed roles

FINDINGS

- Title is 89 characters — nearly 30 characters over the safe limit; this will be truncated hard in every SERP and in the browser tab.
- 4 open roles (Senior Full-Stack Engineer, Product Designer, Growth & Marketing Manager, Customer Success Specialist) are rendered as plain cards with no JobPosting structured data — this disqualifies the page from Google for Jobs, a very high-intent free listing surface for exactly the terms in the Careers keyword cluster.
- No individual URLs per role (e.g. /careers/senior-full-stack-engineer) — each role is a strong long-tail landing page opportunity ("fintech software engineer jobs dubai") that currently funnels all equity into one generic /careers URL.

RECOMMENDED TITLE (48 CHARS)

Careers at FinTrack — Fintech Jobs in Dubai, UAE

RECOMMENDED META DESCRIPTION (150 CHARS)

We're hiring engineers, designers, marketers and support specialists to build the UAE's leading personal finance app. Remote-friendly. See open roles.

PRIMARY TARGET KEYWORD

FinTrack careers

SECONDARY / SUPPORTING KEYWORDS

- fintech jobs Dubai
- fintech jobs UAE
- remote finance jobs UAE
- startup jobs Dubai

Current Title	Contact FinTrack — We'd Love to Hear From You 47 chars
Current Meta Description	Have a question, feedback, or need support? Reach out to the FinTrack team. We typically respond within one business day. 124 chars
H1	We're here to help you.
Structured Data	None (ContactPage / Organization schema not implemented)

FINDINGS

- Title and description length are both healthy — no truncation risk. Keep this as the reference length for the rest of the site.
- H1 is a soft brand phrase with no keyword targeting — acceptable for a low-search-volume contact page, but the page currently cannot rank for anything beyond "contact FinTrack".
- No LocalBusiness / Organization schema even though Dubai is referenced elsewhere on the site (careers page) — if FinTrack has a physical or registered UAE office, this page is the natural home for that markup and would support local pack / knowledge panel visibility.

RECOMMENDED TITLE (40 CHARS)

Contact FinTrack — Support & Sales | UAE

RECOMMENDED META DESCRIPTION (134 CHARS)

Questions about FinTrack, billing, or partnerships?
Contact our Dubai-based support team — we typically
reply within one business day.

PRIMARY TARGET KEYWORD

Contact FinTrack

SECONDARY / SUPPORTING KEYWORDS

FinTrack support

FinTrack customer service

FinTrack help

Current Title	Privacy Policy — FinTrack 27 chars
Current Meta Description	FinTrack Privacy Policy — how we collect, use, and protect your personal and financial data. 94 chars
H1	Privacy Policy
Structured Data	None (expected — low priority)

FINDINGS

- Low commercial priority page — length and structure are fine as-is.
- noindex prop is explicitly passed as false — functionally correct (page should be indexed so it can be linked from footer and cited for trust), but the explicit `noindex={false}` on both /privacy and /terms is redundant since it's already the BaseLayout default; harmless, not worth changing.
- Could reinforce trust/E-E-A-T signals (a growing Google ranking factor for finance apps handling sensitive data) by adding a visible "Data Security" summary section and a link to a dedicated /security page — see content gap section.

RECOMMENDED TITLE (25 CHARS)

Privacy Policy — FinTrack

RECOMMENDED META DESCRIPTION (131 CHARS)

How FinTrack collects, uses, encrypts and protects your personal and financial data. AES-256 encryption, no third-party data sales.

PRIMARY TARGET KEYWORD

FinTrack privacy policy

SECONDARY / SUPPORTING KEYWORDS

- is FinTrack data safe
- how FinTrack protects financial data

Current Title	Terms of Service — FinTrack 28 chars
Current Meta Description	FinTrack Terms of Service — your rights and obligations when using our personal finance platform. 99 chars
H1	Terms of Service
Structured Data	None (expected — low priority)

FINDINGS

- Low commercial priority page — length and structure are fine as-is.
- Same redundant `noindex={false}` note as Privacy — no action needed.

RECOMMENDED TITLE (27 CHARS)

Terms of Service — FinTrack

RECOMMENDED META DESCRIPTION (144 CHARS)

FinTrack's Terms of Service — eligibility, account responsibilities, acceptable use, and your rights as a user of our personal finance platform.

PRIMARY TARGET KEYWORD

FinTrack terms of service

SECONDARY / SUPPORTING KEYWORDS

FinTrack terms and conditions

4. Content Gap Analysis — Recommended New Pages

The keyword plan in Section 5 maps 421 keywords to targets. Only a fraction can realistically be served by the 8 existing pages — the rest require new URLs. Recommended new content surfaces, in priority order:

New Section	Example URLs	Keyword Clusters Served	Priority
/blog/ (educational content hub)	/blog/how-to-budget-in-dubai, /blog/cost-of-living-abu-dhabi-2026, /blog/emergency-fund-calculator-uae	Informational / Blog (55), FAQ / Long-Tail (20)	High
/compare/ (competitor comparison pages)	/compare/ynab-alternative-uae, /compare/mint-alternative, /compare/monarch-vs-fintrack	Competitor Comparison (36)	High
/banks/ (bank-specific landing pages)	/banks/emirates-nbd, /banks/adcb, /banks/fab, /banks/mashreq	UAE Bank-Specific (112)	High
/careers/{role-slug} (individual job pages)	/careers/senior-full-stack-engineer, /careers/product-designer	Careers / Employer Brand (12)	Medium
/security (dedicated trust page)	/security	Security / Trust (8)	Medium
Location content blocks (on homepage or /locations/{emirate})	/locations/dubai, /locations/abu-dhabi	Location-Based (41)	Low

Why this matters: a static 8-page marketing site has a hard ceiling on how many distinct queries it can rank for — one URL can meaningfully target maybe 2–3 closely related keywords before it becomes unfocused. Building out `/blog`, `/compare`, and `/banks` is what unlocks the other ~85% of the keyword plan below.

5. Full Keyword Plan (421 Keywords)

Keywords are grouped into 14 clusters below. Each row lists the keyword, its search intent, the recommended target page (existing or new, per Section 4), and a priority rating for implementation order.

5.1 Cluster Summary

Cluster	Keyword Count
Branded	15
Core / Head Terms	29
Feature / Product	33
UAE Bank-Specific	112
Competitor Comparison	36
Location-Based	41
Informational / Blog	55
Commercial / Pricing	20
Merchant / Category	15
FAQ / Long-Tail Questions	20
Multi-Currency / Expat	15
App Store / Platform	10
Careers / Employer Brand	12
Security / Trust	8
Total	421

5.2 Full Keyword Tables by Cluster

Branded (15 keywords)

Navigational searches for the FinTrack name itself. Low volume individually but highest conversion rate — protect with strong on-page brand signals and review management.

Keyword	Intent	Suggested Target	Priority
fintrack	Navigational	Home /	High
fintrack app	Navigational	Home /	High
fintrack uae	Navigational	Home /	High
fintrack login	Navigational	Home /	High
fintrack pricing	Navigational	Home /	High

finance app data privacy uae	Informational	Privacy /privacy + New: /security	Low
how fintech apps protect financial data	Informational	Privacy /privacy + New: /security	Low
finance apps without bank credential sharing	Informational	Privacy /privacy + New: /security	Low

6. Prioritized Action Roadmap

Phase	Actions	Effort
Phase 1 (Week 1)	• Create public/ directory with robots.txt (incl. Sitemap: directive), favicon.svg, and OG share images for all 8 pages. • Rewrite the 3 over-length titles (Homepage, Careers, FAQ) per Section 3 recommendations. • Add FAQPage JSON-LD to /faq and /pricing using the existing Q&A data arrays already in each page's frontmatter. • Add JobPosting JSON-LD to the 4 roles on /careers. • Fix currency inconsistency on /pricing (USD in schema vs. AED in copy).	Low effort / High impact
Phase 2 (Weeks 2–4)	• Add Organization schema (logo, sameAs, founding date) sitewide, sourced from About page content. • Either remove the unsubstantiated aggregateRating from homepage JSON-LD, or add real, visible customer reviews with Review schema to back it. • Build 4–6 /compare/{competitor} pages (YNAB, Mint, Monarch, Copilot) targeting the 36-keyword Competitor Comparison cluster. • Add internal link from About → Careers.	Medium effort / High impact
Phase 3 (Months 2–3)	• Launch /blog with the first 10–15 posts from the Informational / Blog cluster (55 keywords) — prioritize "how to budget in Dubai," "cost of living UAE 2026," and salary/emergency-fund calculators as pillar content. • Build 4 flagship /banks/{bank} pages (Emirates NBD, ADCB, FAB, Mashreq) to start capturing the 112-keyword bank cluster, then expand to remaining banks. • Add individual JobPosting landing pages per open role.	High effort / High impact
Phase 4 (Ongoing)	• Build remaining /banks and /compare pages to full coverage. • Add a dedicated /security trust page. • Expand blog cadence to cover remaining informational and merchant-specific keywords. • Introduce BreadcrumbList schema once URL depth increases with /blog, /compare, /banks.	Ongoing
